Sai Pavan Neerukonda

Sr. iOS Developer

Portfolio | (713)-364-2595 | sneerukonda83@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Senior iOS developer with 8+ years building consumer-facing mobile apps across banking and insurance (USAA, Citizens Bank), fintech (Greenlight), retail (T-Mobile, The Home Depot), and connected IoT devices (Mattel). Builds in Swift, SwiftUI, and UIKit with MVVM, MVVM-C, and modular architecture; experienced with REST and GraphQL APIs, Objective-C to Swift migration, Bluetooth Low Energy (BLE), XCTest and TDD, and CI/CD with Bitrise and Fastlane. Works in Agile/Scrum teams alongside UI designers, QA, backend engineers, and product owners.

TECHNICAL SKILLS

Languages: Swift, Objective-C, SQL
UI: SwiftUI, UIKit, Auto Layout, Storyboards, XIBs, Core Animation, Core Graphics
Architecture: MVVM, MVVM-C (Coordinator), MVC, modular architecture, protocols and delegation
Networking & Data: REST, GraphQL, JSON, XML, Alamofire, Core Data, SQLite, Realm, Keychain
iOS Frameworks: Core Location, MapKit, Bluetooth Low Energy (BLE), push and local notifications, Face ID / Touch ID (biometrics)
Testing & Debugging: XCTest, TDD, Instruments, Charles Proxy
CI/CD & Dependencies: Bitrise, Fastlane, Jenkins, Swift Package Manager, CocoaPods, Carthage
Monitoring & Analytics: Sentry, Datadog, Mixpanel, Optimizely
Collaboration: Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Rally, Figma, Zeplin, Agile/Scrum

PROFESSIONAL EXPERIENCE

USAA, Plano, TX **Mar 2025 – Present**
Sr. iOS Developer (Contract) | *App: App Store*

- Build features for USAA's banking and insurance iOS app, including the Roadside Assistance, Home Insurance, and Auto Insurance modules.
- Develop with MVVM and a modular architecture in Swift, managing dependencies with CocoaPods.
- Build responsive SwiftUI transaction screens and bridge SwiftUI and UIKit in both directions.
- Integrate REST services using async/await (Swift Concurrency), and refactor code to improve extensibility, maintainability, and testability, with unit tests in XCTest.
- Collaborate with UI designers, QA, backend engineers, and product owners through pair programming; manage code with Git and GitLab.

Tech: *Swift 6*, *Xcode 16*, *SwiftUI*, *UIKit*, *async/await (Swift Concurrency)*, *CocoaPods*, *GitLab*, *Sentry*, *Keychain*, *Face ID / Touch ID (biometrics)*, *REST*, *JSON*, *XCTest*, *TDD*, *Jira*, *Confluence*

Citizens Bank, Remote **Mar 2023 – Mar 2025**
Sr. iOS Developer (Contract) | *App: App Store*

- Developed features for the consumer-facing Citizens Bank iOS banking app, including remote check deposit, transactions, transaction details, and transaction filtering.
- Migrated API integrations from REST to GraphQL and implemented API error handling.
- Built UI in SwiftUI and UIKit (XIBs, Storyboards, Auto Layout) with custom views and ViewBuilder, integrating SwiftUI and UIKit views in both directions.
- Implemented asynchronous and concurrent work with Dispatch Queues.
- Added UIView animations for smooth transitions between accounts.
- Refactored code using MVVM with Swift 5 and Swift Package Manager to improve maintainability and testability, with unit tests in XCTest.

Tech: *Swift 5*, *Xcode 15*, *SwiftUI*, *UIKit*, *Swift Package Manager*, *GraphQL*, *REST*, *OAuth*, *Keychain*, *Face ID / Touch ID (biometrics)*, *UserDefaults*, *Sentry*, *Datadog*, *XCTest*

Greenlight Financial, Remote **Jul 2022 – Mar 2023**
Sr. iOS Developer (Contract) | *App: App Store*

- Developed features for the consumer-facing Greenlight app, which supports children's financial literacy, money management, and investing.

- Built account management, login, and settings flows, including adding a child, in-app cancellation and reactivation, and tax documents.
- Refactored legacy MVC code to MVVM-C (Coordinator pattern).
- Implemented new designs from Figma and supported production issues, using Mixpanel, Datadog, and Optimizely.
- Integrated REST APIs with error handling and used Dispatch Queues for concurrent work, with unit tests in XCTest.

Tech: *Swift 5*, *Xcode 13*, *UIKit*, *Storyboards*, *XIBs*, *Swift Package Manager*, *OAuth*, *Keychain*, *Face ID / Touch ID (biometrics)*, *Sentry*, *XCTest*

T-Mobile, Remote **Aug 2021 – Jul 2022**

Sr. iOS Developer (Contract)

- Developed features for T-Mobile's retail storefront iOS app for T-Mobile sales, including IMEI number port-in and tracking.
- Built SwiftUI features for the Metro project.
- Maintained a modular app with CocoaPods, deep linking, and library integrations.
- Refactored legacy MVC code to MVVM and implemented new designs following T-Mobile's design language.
- Integrated REST APIs with error handling, wrote unit tests in XCTest, and supported production issues.

Tech: *Swift 5*, *Xcode 13*, *SwiftUI*, *UIKit*, *CocoaPods*, *Swift Package Manager*, *REST*, *JSON*, *Keychain*, *Face ID / Touch ID (biometrics)*, *Sentry*, *XCTest*

The Home Depot, Atlanta, GA **Mar 2021 – Aug 2021**

iOS Developer (Contract) | *App: App Store*

- Developed features for pro users on the PIP and PLP pages of the consumer-facing Home Depot app, and converted selected native screens to web pages.
- Refactored a legacy store associate app from Objective-C to Swift 5 using MVVM, and migrated REST calls to GraphQL with generated request and response models.
- Scoped and architected a self-driven project, broke requirements into Jira stories and tasks, and designed a complex transactional flow using a third-party framework.
- Enhanced an existing store app with currency conversion.
- Contributed to CI/CD with Bitrise and Fastlane, integrated Sentry for API error logging, and handled code reviews and bug fixes.

Tech: *Swift 5*, *Xcode 10/11*, *CocoaPods*, *Alamofire*, *GraphQL*, *JSON*, *Storyboards*, *Auto Layout*, *Salesforce SDK*, *GitHub*

Mattel, Los Angeles, CA **Dec 2019 – Mar 2021**

iOS Developer (Contract) | *App: App Store*

- Developed the Fisher-Price Smart Connect app for BLE-connected baby gear, showing real-time device status and controlling lights, music, vibration intensity, schedules, and alarms.
- Integrated device data from backend services, syncing data to devices and updating the UI, with background downloads and status indicators based on activity modes.
- Implemented local notifications for cry detection and noise detection alerts.
- Integrated Salesforce chat and product information, added feature flags to show and hide features, and built authentication with auto-login.
- Built with MVVM, Core Data, Auto Layout, Storyboards, and UIKit, added UIView animations for smooth transitions between connected products, and integrated Sentry for API error logging.

Tech: *Swift 4.0/4.2/5.0*, *Xcode 10/11*, *BLE*, *CocoaPods*, *Alamofire*, *JSON*, *Salesforce SDK*, *In-App Rating*, *Zeplin*, *GitHub*

Altice, Bethpage, NY **Apr 2018 – Dec 2019**

iOS Developer (Contract) | *App: App Store*

- Developed iOS apps in Swift and Objective-C with UIKit and Cocoa Touch in an Agile environment, building custom views, table views with custom cells, and popovers.
- Integrated web services with JSON and XML parsing, implemented push notifications, and pre-fetched data for smooth screen transitions.
- Stored passwords, keys, and documents with Keychain Services, and verified server APIs and complex views with test-driven development.
- Handled code reviews, bug fixes, and app support for new iOS versions, tracking defects in Rally.

Tech: *Swift 3/4*, *Objective-C*, *Xcode 10*, *REST*, *JSON*, *XML*, *Git*, *Jira*
